

Prof. Anna Nelson
The American University
Washington, DC

4/11/95

Dear Prof. Nelson,

Please excuse my typing and writing. They cannot be any better.

If you are not familiar with my work, my eighth book on the JFK is to appear soon. I am alone among those writing books who does not theorize about anything, including conspiracies. My work is based almost entirely on the official evidence. There is no significant errors in any of them and almost no insignificant errors. Of all these of whom I have written critically not one has written or phoned to complain of unfair treatment or alleged any error. I now draw on about a quarter of a million pages of once-withheld official records I obtained by a series of a dozen or so FOIA lawsuits. Most were against the FBI. It and all other agencies were represented by the Department of Justice. In the 1974 amending of the Act my CA 75-226, rather the suit I^{re} filed as CA 75-226 was cited in the legislative history as requiring the amending of the investigatory files exemption. This is the number of first suit filed after amendment. In that lawsuit the Department of Justice told that court that I knew more about that assassination and its investigations than anyone working for the FBI. That was its (successful) defense against my sworn allegation of FBI perjury!

My published work makes it clear that in that time of great stress and ever since then all the institutions of our society failed.

I fear your board will be an addition to the list of failures. Which I do not want.

I am 82, have been in impaired health for many years and there is much work I want yet to do. This includes making use of the fact that a member of the Warren Commission, Senator Russell, liked my work and encouraged it to his dying day. This no longer rests on what I say he told me. I have it from his archive. From this and from the archive of another member, Senator John Sherman Cooper, I have their absolute refusal to agree with the basis of the Warren Report, its single-bullet theory of Arlen Specter. My NEVER AGAIN! has more on this. It is to be published this month.

I ask nothing of you. I write to inform you. If you have any questions, I'll undertake to answer them.

If you should like to know more about me and my work, of the college professors who like me do not theorize conspiracies and who teach assassination courses not as who-dunits but as government is taught, the closest is Dr. Gerald McKnight at local Hood College. It will have all my work and all rights to it along with all the FOIA records I have and our property.

Sincerely,

Harold Weisberg
